

Firmlife International Academy

Excellence in Education.

For a Firm Life.

School with a Mission

Firmlife International Academy (FLIA) was established in 2023 as a christian school located in the district of Aduman, Kumasi (Ghana).

The school's vision is to give pupils from all walks of life access to high-quality education and to provide each child with the best possible support so that they are prepared for an independent future.

The teaching of Christian values, motivated teachers and a learner-friendly atmosphere are distinctive features of the school.

School for Young and Old

Starting with a creche, there are already different class levels in the school, ranging from kindergarten to primary school through to secondary school (junior high).

Despite its young age, the FLIA already has more than 80 pupils - and the classes continue to grow...

Growing together

Pupils are currently taught in temporary classrooms located right next to a church building.

As the school has not yet reached the size to be able to finance a structural extension on its own, support is needed.

Support

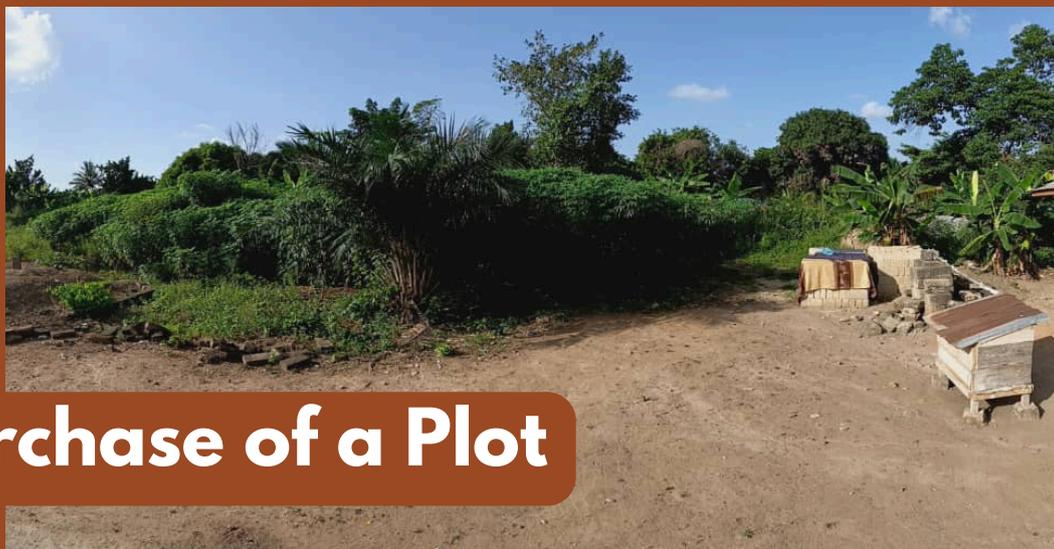

FLIA does not yet have its own building - but with the help of loyal partners, the school can continue to grow and be a blessing to even more children.

There are several ways to support the school: You can choose between a donation for the purchase of a plot of land, a contribution to the school's own pig farm or a monthly building grant in the form of a sponsorship.
